Subject: RE: MHS - Amphitheater and Room 303

Dear Joni,

Thank you for contacting me today to discuss the fenced-off area between the Angel Shark building and Amphitheater Quad at the Malibu High School.

Please find the following attachments that address your questions regarding the soil contamination at the High School:

1. Map of the Proposed Soil Step-out Locations (ENVIRON, 8/14/2014) – note: the soil samples were collected 8/15/2014, and the data should be available for public review within the next two weeks. DTSC will require the contaminated soil be removed from this area. The work will occur during weekends when the campus is closed.
2. Email sent to Jennifer deNicola (8/15/2014) describing the soil investigation results.
3. Memorandum – Updated Summary of Soil Sampling Results for the Malibu High School (ENVIRON, 8/15/2014)

Joni, please let me know if you have any questions, and that I am always available to discuss this investigation with you and other members of your community.

Thank you, Maria

Hi Maria,

I am concerned about the Amphitheater Quad at Malibu High School that is currently blocked off from students to pass through. Principal David Jackson promised Lea Devine and Myself... that if the dirt was not released in any area of the school... that he would consider postponing the first day of school to remediate since this can not be done with students present. Can you please let me know what is planned for this section. Also I am still waiting to hear if ALL rooms have been released including room 303 at MHS.

Thank You Maria... I look forward to hearing from you.

Very Sincerely,

Joni Marcellino

Hi Maria,

Can you please let me know the skinny on the Amphitheater Quad at Malibu High School. My daughter told me that it is shut down with a fence. Also.. I am confused because Kelly Wedel told me that room 303 still has not been released but the Malibu High School Principal David Jackson assures me that it has been released. Can you please confirm this for me... I have written to Kelly as well.

Thank You Maria...

I look forward to hearing from you..

Very Sincerely,

Joni Marcellino

Today FROM DAVID JACKSON :

Joni: The last room which was 303 was released which means the whole building was released.

Dave

Today FROM KELLY WEDEL :

Hi Joni-

Thanks for your email. In regards to the classrooms being cleared, it is our understanding that a few rooms still remain closed (Room 303 of the Music Building, and Room 506 of Building G). This is based on the latest information we received from the district: <http://www.smmusd.org/PublicNotices/Malibu.html>

As for the soil component of PCBs, the State's Department of Toxic Substances Control (DTSC) is the lead on this manner. Maria Gillette (Maria.Gillette@dtsc.ca.gov) should be able to provide you with the most up-to-date status.

Thanks,

Kelly
